

## Org +Workshops - seminars and workshops

Publish your workshops and seminars with Org +Workshops. Org +Workshops extends the Organiser (org) with a database for Workshops and all needed templates. Organiser provides a calendar, locations, online-tickets and staff-management out of the box.

Version: 1.0.0 - 2011-10-09

Extension Key: org\_workshops

Language: en

Keywords: forAdmins, forDevelopers, forAdvanced, organiser, workshops, seminars

# Screenshots

## Frontend

The screenshot shows the 'Weiterbildungsranking' (Further Education Ranking) page on the website [zeitoffiziere.de](http://zeitoffiziere.de). The page features a search bar at the top with options to 'Sign In', 'Sign Up', and 'Search the Site'. Below the search bar is a navigation menu with links to 'Home', 'Offizier & Wirtschaft', 'Weiterbildung' (highlighted), 'Karriere', 'Umfrage', and 'Impressum / Datenschutz'.

The main content area is titled 'Weiterbildungsranking' and contains a search section with the following filters:

- Suchbegriff:
- Alle Anbieter:
- Alle Bundesländer:
- Alle Kategorien:
- Alle Abschlüsse:
- Alle Themen:
- Alle Bewertungen:

Buttons for 'Zurücksetzen' (Reset) and 'Suchen!' (Search) are located to the right of the filters. Below the filters is a pagination bar showing '« « 1-20 21-40 41-60 61-77 » »'.

The main table displays a list of seminars with the following columns: Seminar, Anbieterinformation, Details, Bundesland, and Bewertung. The table contains 10 rows of data, each representing a different seminar offering.

Seminar	Anbieterinformation	Details	Bundesland	Bewertung

**Das Programm**

Das berufsbegleitende Master Fernstudium Business Consulting vermittelt in einer Regelstudienzeit von 4 Semestern das von Ihnen erwartete betriebswirtschaftliche Know-how. Ein starker inhaltlicher Fokus, unsere Praxisorientierung und das durchgängige Fallstudienkonzept unterscheiden unser Studium von zahlreichen Angeboten am Markt.

Ihr Abschluss „Master of Business Consulting“ ist ein von der Hochschule Wismar vergebener staatlicher Studienabschluss. Er ist national und international anerkannt. Der Studiengang wurde im Oktober 2006 durch die Fibaa akkreditiert. Mit dem „Master of Business Consulting“ erwerben Sie einen Titel, der Ihr Engagement für Ihre persönliche Weiterbildung zeigt, gegenüber Externen eine hohe betriebswirtschaftliche Kompetenz vermittelt und zudem sämtliche weitere akademische Optionen bis hin zu einer Promotion eröffnet. Der Masterabschluss eröffnet ebenfalls den Zugang zum höheren Dienst.

**Angeboten wird der Studiengang an den Standorten:**

- Wismar
- München
- Frankfurt am Main
- Düsseldorf
- Zürich
- Wien

Prof. Dr. Thomas Wilke  
Studiengangsleiter

**Berufsfeld / Zielpublikum**

Der Master-Fernstudiengang Business Consulting bietet Ihnen vielfältige berufliche und persönliche Optionen.

Nach Abschluss des Studiums sind Sie in der Lage, sämtliche relevante betriebswirtschaftliche Beratungsfelder zu bearbeiten und tragfähige Lösungen für Ihr Unternehmen bzw. Ihren Mandanten zu finden und zu implementieren.

Dieses Know-how qualifiziert Sie unmittelbar für eine Aufgabe mit Managementverantwortung bzw. bietet Ihnen die Chance, Ihre Mandantenbeziehung zu stärken und zu intensivieren.

**Schwerpunkte / Curriculum**

- 1.Semester**
  - Grundlagen der Unternehmensberatung
  - Personalberatung und Coaching
  - Investitions- und Finanzierungsberatung
  - Existenzgründungsberatung
  - Fallstudie zur Existenzgründungsberatung
- 2.Semester**
  - Strategische Unternehmensberatung
  - KMU-Controlling
  - Unternehmens- und Bilanzanalyse
  - Marketing und Vertriebsberatung
  - Fallstudie zum Controlling
- 3.Semester**
  - Corporate Finance-Beratung
  - Prozess- und Organisationsberatung

Illustration 2: Live example <http://zeitoffiziere.de/> - Workshops (seminars) in single view

# Introduction

## What does it do?

Org +Workshops extends [Organiser \(org\)](#) with workshops (seminars, courses, tutorials ...).

A workshop is a special type of a calendar item like an event.

But it has additional appropriate fields (like requirements, subject) and categories (like category, focus, sector, audience, degree, course type, content risk cycle, type).

Workshops blends in the calendar items both in the back-end and in the front-end. For that Org +Workshops is distributed with default templates for HTML and TypoScript.

Workshops aren't localised yet.

## What do you need?

- A TYPO3 installation with an entire Organiser (org) installation.

## Audience

- TYPO3 integrators
- Professional TYPO3 developers, TYPO3 agencies
- Organisers

# Installation overview

1. Install Static Info Tables (static\_info\_tables) if not available in your system yet. Install Org +Workshops and [configure](#) some options in the Extension Manager.
2. [Add and configure](#) a sysfolder in the page tree.
3. Complement your [TypoScript configuration](#).
4. [Add a page](#) in the page tree and insert needed content element.
5. Insert your workshop data.

This manual will demonstrate you step by step how to integrate Workshops into an existing Organiser. We assume that you have installed the Organiser extension with the Organiser installer.

# Manual: Installation details

## Step 1 - Extension manager

### Install Static Info Tables (static\_info\_tables)

If the extension static\_info\_tables is not available in your system please import and install it.

### Install Org +Workshops

Install this extension: Org +Workshops supported by the extension manager. Confirm the database updates.

### Adapt the extension configuration to your needs

**Extension Manager**  
Extension: **Org +Workshops - seminars and workshops** (org\_workshops)

**Current status:**  
**The extension is installed (loaded and running!)**  
Click here to remove the extension: [Remove]

**Configuration:**  
(Notice: You may need to clear the cache after the configuration of the extension. This is required if the extension adds TYPOScript depending on these settings.)

**Enable features**

**Quick Start** [quickstart]

Please save your changing twice! Prompts will have a chance for updating.

If you like to start with the **Organiser +Workshop** modul immediately, start with the default configuration of the extension manager. You have to take care of two items:

- Linking from a workshop record to a record of another **Organiser** table is possible only, if the records are store in the same directory.
- "Store record configuration" has set to [EASY]. Please check below.

Have fun!

All alignments in the extension manager effect the TYPO3 backend only.

**1 Localise special backend labels** [LLstatic]  
Language for special backend labels like TYPOScript static templates and the link handler.  
[English]

**2 Exclude Workshop Organiser fields** [TCA\_simplify\_organiser]  
Simplify backend forms! Default: The editor has access to most fields. None excluded: The editor has access to all fields like the administrator. All excluded: the editor has access to required fields only like the title. This option has an effect for editors and it hasn't any effect for administrators.  
[Default (recommended)]

**3 Exclude fe\_group controlling** [TCA\_simplify\_fegroup\_control]  
Simplify backend forms! If you have a website without a fe\_user administration, you don't need the fe\_group controlling field in backend forms. This option marks it in organiser tables 'excluded'. This has an effect for editors and it hasn't any effect for administrators.  
[Yes: website doesn't contain private content]

**4 Store record configuration** [store\_records]  
[Easy]: less configuration costs. If you want to link from one record to another, both have to be stored in the same directory. It may be confusing in case of a lot of data. [Clear presented]: each record group has its own directory. I.e. fe\_users are in [staff], events are in [calendar]. Disadvantage: you have to configure page TSconfig and you will have some wizards without an add icon and without an list icon. [Multi grouped]: Same like [clear presented], but record groups can have more than one directory. It enables sophisticated access rules. See section "FAQ: Store record configuration" in the manual.  
[Easy 1: all in the same directory]

**5 Full wizard support** [full\_wizardSupport]  
If full wizard support is enabled, main records will have all three icons for their category records: edit, add and list. This is best usability. But you have to store category records in the same directory like the main records. You have to rough it, if there are needs to store categories in other directories. This property has only an effect in case of store records [clear presented] or [multi grouped].  
[Yes (recommended)]

[Update]

All alignments in the extension manager effect the TYPO3 back-end only. They are similar to the settings in the extension **Organiser**.

(1) You have to save the form twice probably - prompts will have a chance for updating.

(2) Some labels like TYPOScript static templates and the link handler can be localised in back-end.

(3) + (4) You have the possibility to simplify back-end forms. See section "1.6. Controlling by the extension manager" in the **Organiser** extension manual.

(5) Same like "Store record configuration" in the **Organiser** extension.

Note: To avoid unexpected results please select here the same value like in extension **Organiser**. (If you have used the **Organiser** installer select "Clear presented". Save the form twice, you'll get the prompt 'Organiser and Organiser +Workshops have the same configuration for storing records: [Clear presented: each record group in one directory at most]. The same configuration is recommended.'

Organiser and Organiser +Workshops have the same configuration for storing records: [Clear presented: each record group in one directory at most]. The same configuration is recommended.

(6) Same like "Full wizard support" in the **Organiser** extension.

Illustration 3: Extension Manager with configuration options

## Step 2 – Configuration: Page tree – new folder + TSconfig

Assumed you used the Organiser Installer to set up your Organiser you should have a page tree similar to Illustration 4 at the moment. (If you did the installation manually the following steps are related to option “Store record configuration [store\_records]” Clear presented: each record group in one directory at most (setted in the Extension manager; see section Install Org +Workshops)<sup>1</sup>.

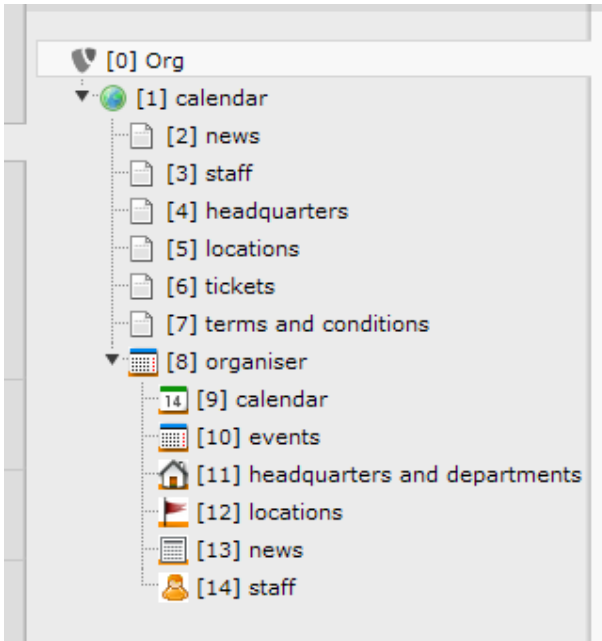

Illustration 4: Current page tree

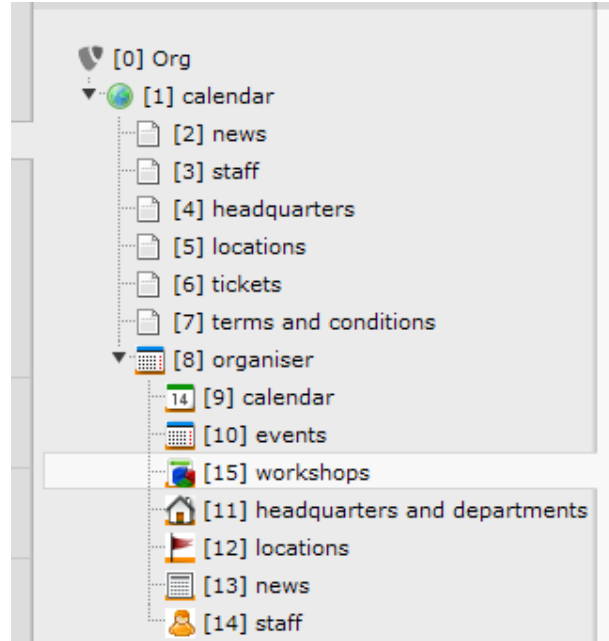

Illustration 5: Result – page tree with workshops folder

### Add a new sysfolder “workshops”

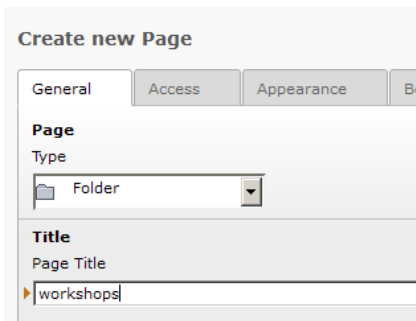

Illustration 6: Title of new page

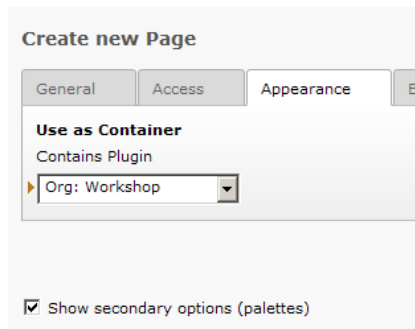

Illustration 7: Select plugin

Add a new page (type: Folder) as a child record of page “organiser”, name it “workshops” e.g. and open it to edit. Uncheck “Disable” (tab Access) and select “Contains Plugin → Org: Workshop” (tab Appearance; optional).

### Add Page TSConfig

Add in the field 'Page TSConfig'

```
mod {
    web_list {
        allowedNewTables (
            tx_org_workshop, tx_org_workshop_audience, tx_org_workshop_cat,
            tx_org_workshop_course, tx_org_workshop_degree, tx_org_workshop_focus,
            tx_org_workshop_riskcycle, tx_org_workshop_sector, tx_org_workshop_type
        )
    }
}
```

Save and close.

**Note:** If you are not allowed to insert a new page go to page “organiser” and edit its page properties:

<sup>1</sup> Using the option “Easy 1” or “Easy 1” in the Extension Manager Configuration you can skip the chapter “Step 2 – Configuration: Page tree – new folder + TSconfig”.

In the field 'Page TSConfig' search for

```
mod {
  web_list {
    // Deny all tables!
    allowedNewTables = xxx
  }
}
```

and replace it by

```
mod {
  web_list {
    // Allow pages
    allowedNewTables = pages
  }
}
```

- with the installer plugin and
- a ready TypoScript template

## Intermediate result

Let's do us a first test:

- Go to the page "[15] workshops" and create a new record "Workshops" (see section "Step 5 - Organiser records: Insert a new workshop"), name it "Sample Workshop" e.g. Every sample data is OK.
- Go to the page "[9] calendar" and create a new record "Sample Calendar data".
- Switch the field "Event data" to "Take it from the workshops table".

Now you can see further down in the field "Workshops" - nothing:

Illustration 8: New record

The screenshot shows the 'Edit Calendar' form for the event '04-04-11 19:46' on the page 'calendar'. The form has several sections: 'Event data' (with a dropdown set to 'Take it from the workshops table'), 'Title of the event' (with the text 'Sample Calendar data'), 'Datetime' (with the value '19:46 4-4-2011'), and 'Type of Event' (with a dropdown and icons). At the bottom, there is a section titled 'Workshops' which contains a list of workshops. The list is currently empty, and the 'Workshops' title is circled in red.

Illustration 9: Empty "Workshops" list

Although there is an workshop record the list "workshops" remains empty. Why? Do the next configuration step:

## Add page TS config: TCE Form

Open the page "[8] organiser" to edit it's page properties. Complement the existing Page TSConfig for organiser tables in the following way:

```
0:
1:
2: // Created by ORGANISER INSTALLER at 2011-08-30 5:09:05 - BEGIN
...
32: // organiser tables
33: TCEFORM {
34:   fe_users {
35:     tx_org_news {
36:       PAGE_TSCONFIG_IDLIST = 8,13
37:       PAGE_TSCONFIG_ID     = 13
38:     }
39:     tx_org_department {
40:       PAGE_TSCONFIG_IDLIST = 8,11
41:       PAGE_TSCONFIG_ID     = 11
42:     }
43:     tx_org_workshop {
44:       PAGE_TSCONFIG_IDLIST = 8,15
45:       PAGE_TSCONFIG_ID     = 15
46:     }
47:   }
48:   tx_org_cal_all_tables {
49:     fe_users {
50:       PAGE_TSCONFIG_IDLIST = 8,14
51:       PAGE_TSCONFIG_ID     = 14
52:     }
53:   }
54: }
...
77: tx_org_newscat < .tx_org_news
78: tx_org_location {
79:   PAGE_TSCONFIG_IDLIST = 8,12
80:   PAGE_TSCONFIG_ID     = 12
81: }
82: tx_org_workshop {
83:   PAGE_TSCONFIG_IDLIST = 8,15
84:   PAGE_TSCONFIG_ID     = 15
85: }
86: tx_org_workshop_audience < .tx_org_workshop
87: tx_org_workshop_cat       < .tx_org_workshop
88: tx_org_workshop_course    < .tx_org_workshop
89: tx_org_workshop_degree    < .tx_org_workshop
90: tx_org_workshop_focus     < .tx_org_workshop
91: tx_org_workshop_riskcycle  < .tx_org_workshop
92: tx_org_workshop_sector    < .tx_org_workshop
93: tx_org_workshop_type      < .tx_org_workshop
94: }
95: tx_org_cal < .tx_org_cal_all_tables
...
111: tx_org_newscat < .tx_org_cal_all_tables
112: tx_org_workshop < .tx_org_cal_all_tables
113: tx_org_workshop_audience < .tx_org_cal_all_tables
114: tx_org_workshop_cat < .tx_org_cal_all_tables
115: tx_org_workshop_course < .tx_org_cal_all_tables
116: tx_org_workshop_degree < .tx_org_cal_all_tables
117: tx_org_workshop_focus < .tx_org_cal_all_tables
118: tx_org_workshop_riskcycle < .tx_org_cal_all_tables
119: tx_org_workshop_sector < .tx_org_cal_all_tables
120: tx_org_workshop_type < .tx_org_cal_all_tables
121:
122: tx_org_cal_all_tables >
123: }
124: // organiser tables
125: // TCEFORM
126:
...
```

The relevant lines herein are 43 ... 46, 82 ... 93 and 112 ... 122 (yellow background). Note that in this example the value 15 used in line 44 and 45 is corresponding to the uid of the page "workshops". **Important: Please correct fe\_user to fe\_users in line 49!**<sup>1</sup>

(The line numbers in your configuration may differ from that in the snippet above.)

Now you can see the list "Workshops" as expected:

<sup>1</sup> The misspelled value comes with Organiser Installer (version 1.0.1 and prior; see [bug fix #29553](#))

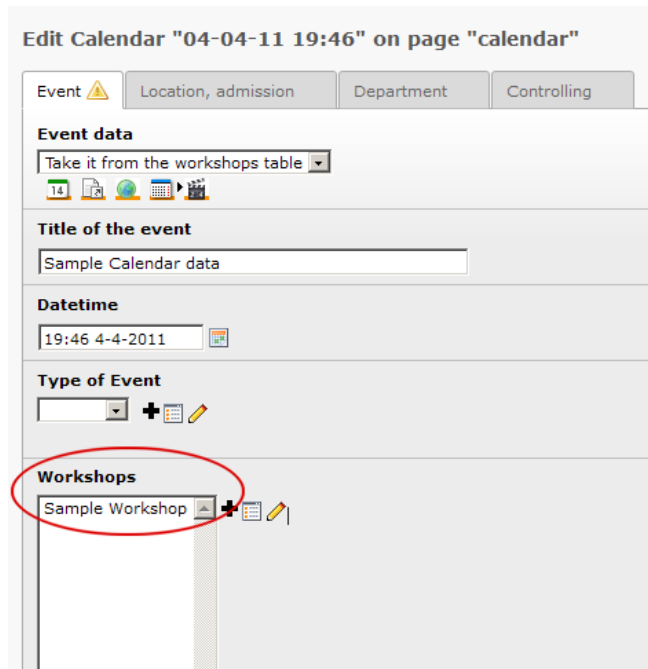

Illustration 10: "Workshops" list is now available

### Add page TS config: linkhandler configuration

Complement the existing Page TSConfig for the linkhandler in the same form field:

```
133: // mod.tx_linkhandler
134: mod.tx_linkhandler {
135:   fe_users.onlyPids          = 14
...
141:   tx_org_news.onlyPids       = 13
142:   tx_org_workshop.onlyPids   = 15
143: }
...
150: // LINKHANDLER
```

The relevant line herein is 142. Note that in this example the value 15 used in line 13 is corresponding to the uid of the page "workshops". (The line numbers in your configuration may differ from that in the snippet above.)

**Note:** Please check that the complete linkhandler configuration is done either

- in your root page  
(if your organiser sysfolder is in the rootline) or
- in your organiser sysfolder and the root page too  
(if your organiser sysfolder is not in the rootline. This may be e. g. in multi domain environments where several domains share the organiser data.)

## Step 3 – Configuration: TypoScript

Go to page "[1] calendar" and open the TypoScript template record to edit ("page\_organiserinstaller\_002" in this example). Select tab "Includes" and add "+Org-Workshop: Basis (obligate!)" / "+Org-Workshop: Workshop" in the field "Include static (from extensions)":

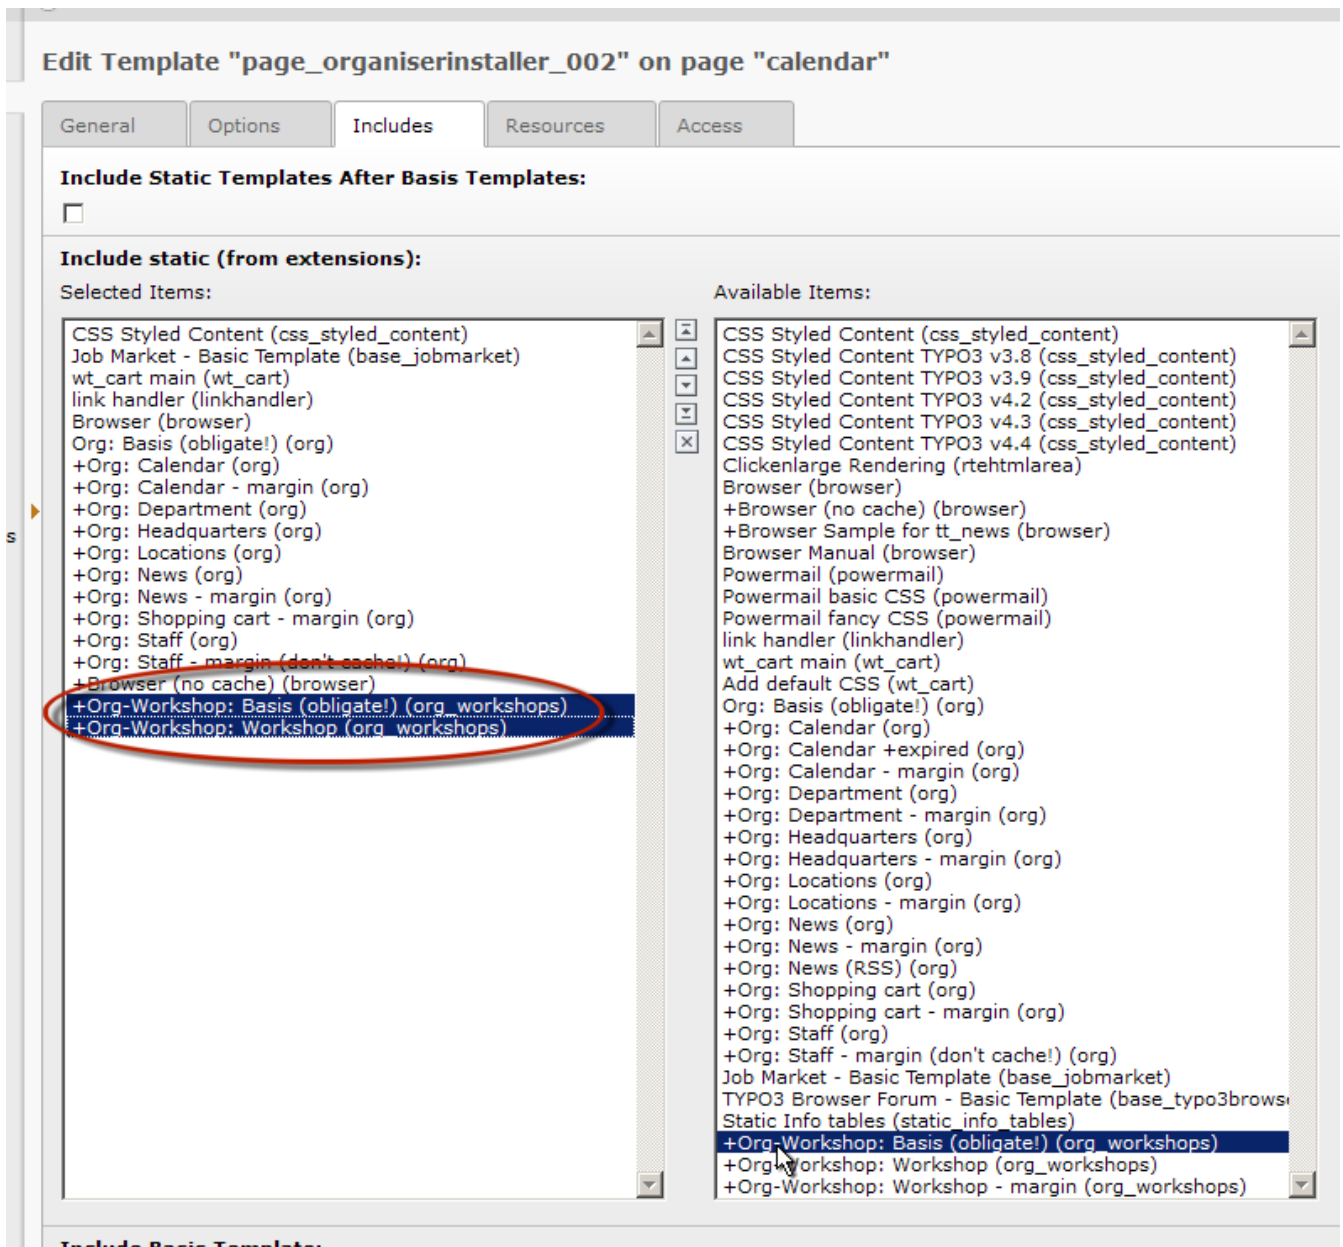

Illustration 11: Include static (from extension)

Save and close.

Switch to the Constant Editor, select Category: "ORGANISER WORKSHOPS" and enter the two page uid's:

- page uid workshop (the page containing the browser plugin for displaying data in Frontend; 16 in this example)
- sysfolder uid workshop (the sysfolder containing your workshop records; 15 in this example)

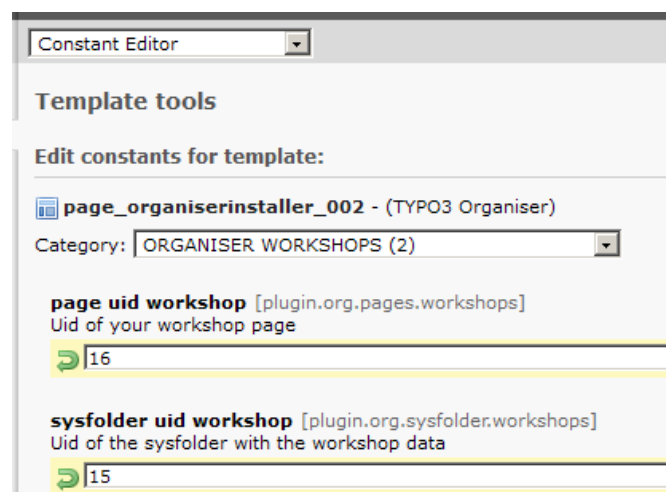

Illustration 12: Constant Editor with page uid's

## Step 4 – Configuration: Page tree – new page / content

Add a new pages (type: Standard). Name it “Workshops” e.g.

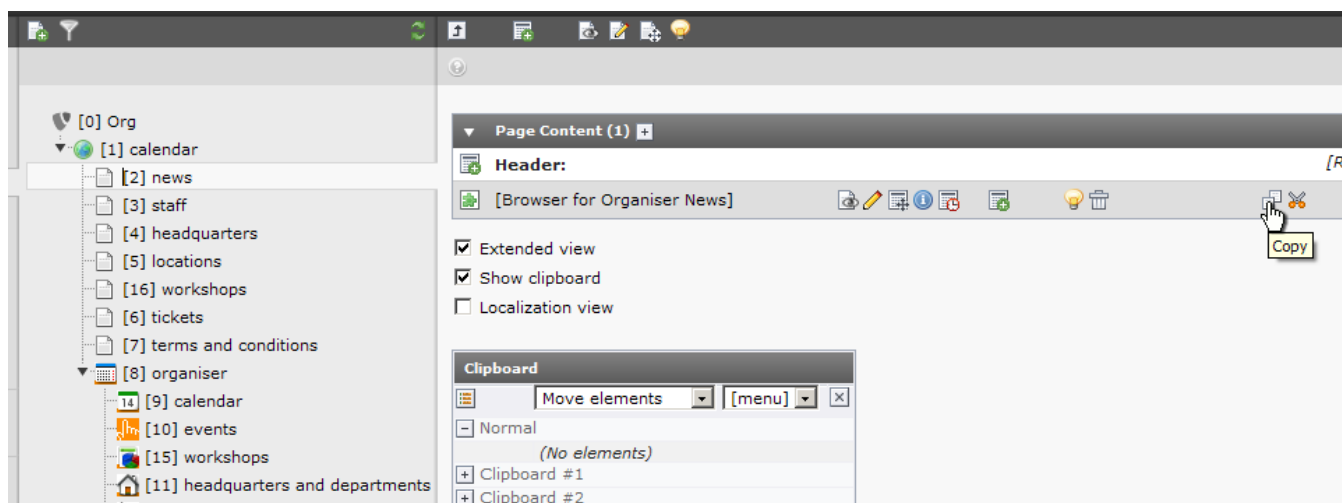

Illustration 13: Copy page content

Go to the page “[2] news” with the list module and copy the page content “[Browser for Organiser News]” to the clipboard.

Go to the page “Workshops” and copy the clipboard content here.

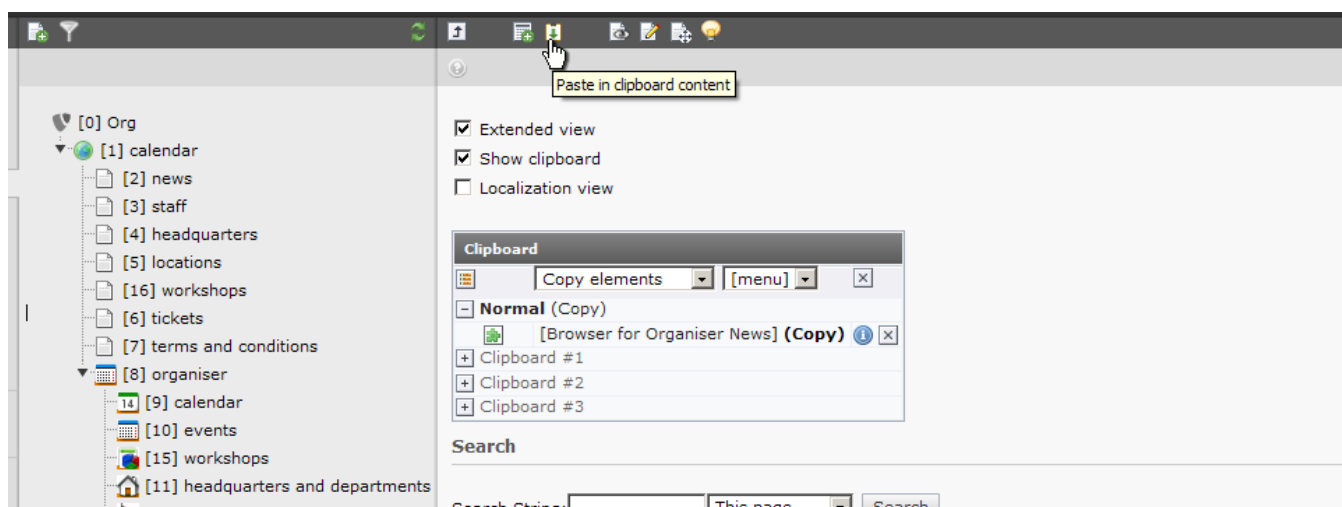

Illustration 14: Insert copy of page content

Un-hide this record and open it to edit:

- Change the header into “[Browser for Organiser Workshops]” e.g.
- Switch to the tab “Plugin”, select the tab “Templating” and choose the HTML-Template “Org: Workshops (org)”.

- Select the tab “General” and choose “” in the field “Views: Enabled list views...” the item “351: Workshops”

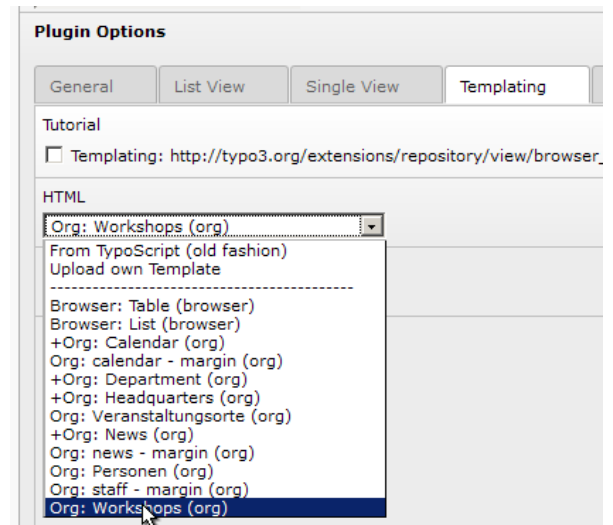

Illustration 15: Select Workshops HTML template

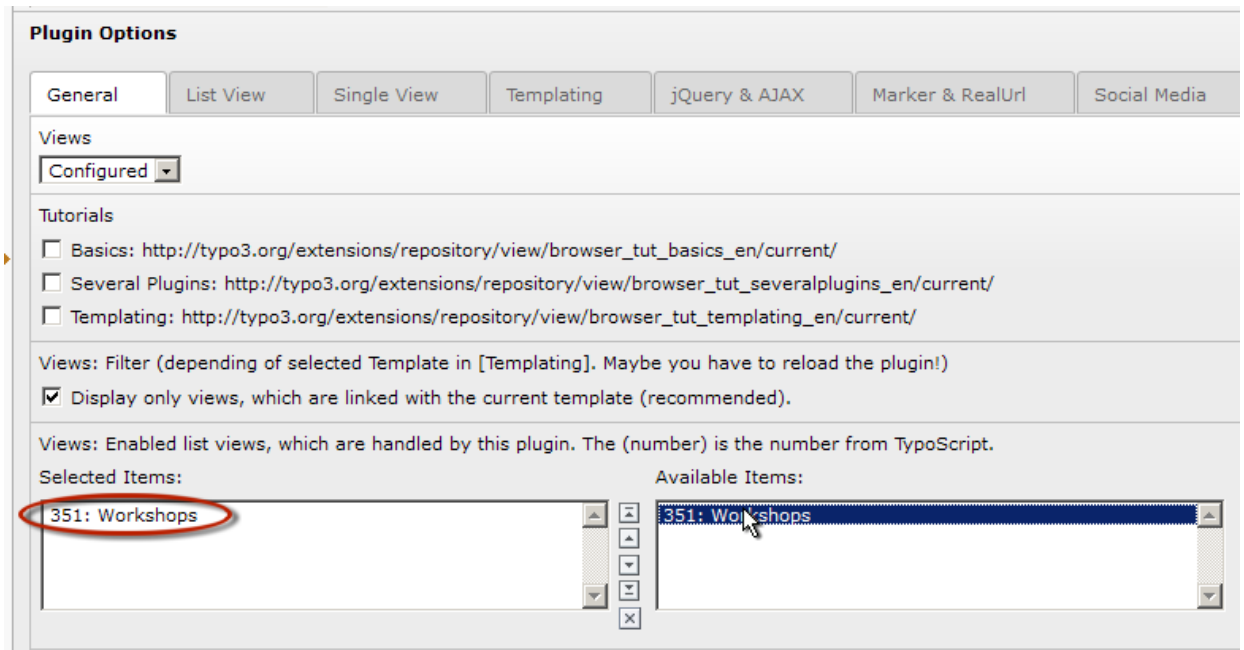

Illustration 16: Select Workshops TypoScript template

- Select the tab “List View” and change the Title into “Organiser Workshops”. Save and close.

## Step 5 – Organiser records: Insert a new workshop

- Preparation: Create a new record “Workshops: types” on the page “[15] workshops”. Every sample data is OK. (“Type” is a mandatory field in workshops.)
- Create a new record “Workshops” on the page “[15] workshops”. Every sample data is OK. Insert at least a title (field “Name of the workshop” on tab “Workshop”), a type (on tab “Categories”) and a provider (on tab “User & provider”). Save and close it.

# Helpful suggestions and benefits

## Forum

If you have helpful suggestions, feel free to publish any question or code snippet on

- TYPO3 Organiser forum at  
<http://typo3-browser-forum.de/>

Posts are welcome in English and German.

## TYPO3 Forge

Bugs and Feature requests can be posted on TYPO3 Forge too:

- [http://forge.typo3.org/projects/show/extension-org\\_workshops](http://forge.typo3.org/projects/show/extension-org_workshops)

## Sponsoring

Do you like to subsidise the TYPO3 Organiser project? Please visit

- TYPO3 Organiser Sponsoring  
<http://typo3-organiser.de/sponsoring/>

We would be very happy.

## To-Do List

Add localization to workshop tables.

# Further Information

## Other extensions published by Die Netzmacher

-  Browser - the TYPO3-Frontend-Engine. The Browser is the fast way for your data to the TYPO3 frontend. It displays content from related tables. You need 1 line TypoScript for a result list with a search form, a record browser and an a-z browser. Images are wrapped self-acting. SEO, Search Engine Optimization, is integrated.  
<http://typo3.org/extensions/repository/view/browser/current/>
-  Green Cars (Grüne Autos) - Database optimized for ecological cars. It is a case study and demonstrates, how to get a complex database with the browser (see above) in three hours only.  
[http://typo3.org/extensions/repository/view/green\\_cars/current/](http://typo3.org/extensions/repository/view/green_cars/current/)
-  Jobmarket is a catalogue with job offers. Views, the a-z-browser, the page-browser, the search, social bookmarks and a lot of other stuff can configured by the Browser plugin with the mouse. Job Market hasn't any PHP code, it should be easy to adapt it to your needs.  
[http://typo3.org/extensions/repository/view/job\\_market/current/](http://typo3.org/extensions/repository/view/job_market/current/)
-  Juridat - Database for Juridical Data. Juridat provides a juridical data base with backend functionality. Juridat is out of the box. It is a teamwork with the Browser.  
<http://typo3.org/extensions/repository/view/juridat/current/>
-  logical\_form: A frontend plugin for evaluating forms. I.e you can evaluate mail addresses.  
[http://typo3.org/extensions/repository/view/logical\\_form/current/](http://typo3.org/extensions/repository/view/logical_form/current/)
-  Organiser provides a lot of features for handle news, events, staff, headquarters, locations, repertoire, workshops and a calendar. Sell your online tickets! Available from April of 2011  
<http://typo3-organiser.de/>
-  Majordomo: For subscribing to and unsubscribing from a majordomo mailing list.  
<http://typo3.org/extensions/repository/view/majordomo/current/>
-  Quick Shop (extkey: quick\_shop): The fastest shop in the history of TYPO3. Install it with one mouse click only! Quick Shop is based on the browser (see above) and powermail.  
[http://typo3.org/extensions/repository/view/quick\\_shop/current/](http://typo3.org/extensions/repository/view/quick_shop/current/)
-  PDF Controller (pdfcontroller) - Offer your HTML page for PDF download. Controll the conversion with the integrated user interface.  
<http://typo3.org/extensions/repository/view/pdfcontroller/current/>
-  seo\_dynamic\_tag: Search Engine Optimisation. You can generate values dynamically with this extension especially for the <title>-tag, for the <meta>-tag description and the <meta>-tag keywords.  
[http://typo3.org/extensions/repository/view/seo\\_dynamic\\_tag/current/](http://typo3.org/extensions/repository/view/seo_dynamic_tag/current/)
-  tt\_news Marker (extkey: ttnews\_marker) enables to add any marker to a tt\_news HTML template including links. Any marker has the std\_wrap property.  
[http://typo3.org/extensions/repository/view/ttnews\\_marker/current/](http://typo3.org/extensions/repository/view/ttnews_marker/current/)
-  tt\_news select configuration (extkey: ttnews\_selectconf) enables to select tt\_news by any SQL clause. The extension adds an andWhere clause to the SQL query of the tt\_news plugin. I. e. it is possible to display tt\_news items in dependence on the ownership of a fe\_user.  
[http://typo3.org/extensions/repository/view/ttnews\\_selectconf/current/](http://typo3.org/extensions/repository/view/ttnews_selectconf/current/)
-  Wine Catalogue provides a data base for wine with regions, wineries, styles, variety and ageing among others. It is localized. English, German and Spanish ist of the box. Wine based on the extension browser (see above).  
<http://typo3.org/extensions/repository/view/wine/current/>

## Manual in PDF

You find this manual as PDF file at

- `doc/manual.pdf`
- [http://typo3.org/extensions/repository/org\\_workshops/current/info/?tx\\_terfe\\_pi1%5BdownloadFile%5D=doc%252Fmanual.pdf](http://typo3.org/extensions/repository/org_workshops/current/info/?tx_terfe_pi1%5BdownloadFile%5D=doc%252Fmanual.pdf)

## Credits

Thanks to my wife and son for their backing.

# Change Log
